LOCATION
US South

[VIEW DOCS](#)

Mobile Quality Assurance enables mobile app testing, user validation, and streamlined quality feedback with sentiment analysis, over-the-air build distribution, automated crash reporting, in-app bug reporting and user feedback.

- **Over the Air Build Distribution**

Get the latest in the hands of the testers as soon as it is available.

- **In-app Bug Reporting**

Submit defects in seconds while using the application from your mobile device.

- **Automated Crash Reporting**

Get aggregated crash logs from pre-production and production environments automatically.

- **User Feedback and Sentiment Analysis**

Get feedback about your app straight from your customers, and mine app ratings and reviews to extract actionable insights.

Pick a plan

Monthly prices shown are for country or region: United States

| Plan | Features | Price |
|------------------------|----------------------------------|-----------------------------------------------|
| ✓ Standard plan | 100 free devices per application | \$199.00 USD/Application \$0.02 USD/Device |

Mobile Quality Assurance (MQA) services are paid for according to the number of mobile apps and the number of devices on which each app is running. Mobile Quality Assurance for Bluemix provides a 30 day trial with a Bluemix account. This trial is also used for evaluating IBM MobileFirst Platform Quality Assurance capabilities. Sign up or login now to start your trial. When logged in use the Create button to start using the service.
